To,

The Director,

BIOTECH, Thiruvananthapuram

We take this opportunity to inform you that the waste treatment plant installed in our Panchayat market is working successfully. This type of system is very useful to treat the degradable waste generated in our market every day. The plant is capable of treating 250 kgs of solid waste and 250 litres of waste water per day. The energy produced in the plant is utilized for the lighting the 50 CF Lamps installed in our market premises and nearby roads. By the installation of the plant, we are able to reduce the consumption of electricity from the K. S. E. B grid in addition to the disposal of waste in an eco friendly manner. We are happy to propagate about the achievement of this project to the people from different Panchayat, and other organisations.

Thanking you,

Abraham Thomas
Yours faithfully,
PRESIDENT
Abraham Thomas
Vadasserikara Grama Panchayat
